Edward	1483 Aprill 9	0 yeeres, 2 mo. 18 da.	146
Richard	1483 Iune 22	2 yeeres, 2 mo. 5 da.	146
Henry	1485 August 12	23 yeeres, 8 mo. 19 da.	144
Henry	1509 Aprill 22	37 yeeres, 10 mo. 2 da.	120
Edward	1546 Ianyary 28	6 yeeres, 3 mo. 19 da.	83
Mary	1553 Iuly 6	5 yeeres, 4 mo. 22 da.	76
Elizabeth	1558 Nouemb. 17	44 yeeres, 4 mo. 13 da.	71
James	1603 March 24	22 yeeres, 9 mo. 3 da.	37
Charles	1625 March 27	VIVAT REX.	

In five hundred fixtie one yeeres,
Twenty foure Princes (as appeares)
Haue reig'd and dyed, one after one,
Long live X. Charles, else we are vndone.
God is prouok'd through peoples sinne,
Full oft for to exchange their King;
If people turne their liues to mend,
Their King and Realme God will defend.

Perkins. 1629.

A description of the foure Quarters of the
Yeere, and first of Winter.

☉ in ♍, ♎, ♏.

According to the custome of Writers in this kinde, Winter Quarter is the first Quarter, which tooke beginning the 12. of December, 1628. at what time the Sunne entred into the first degree of the cold and dry signe Capricorne, being then most remote from vs in his farthest South Declination, causing the dayes with vs to be shortest, and the nightes longest: which Quarter continueth vntill the Sunne hath slowly passed through ♍, ♎, ♏. This Quarter doth naturally resemble old age. The diseases incident to this Quarter, are Coughes, Cathars, Rheumes, Obstructions of the Lungs, and such like, proceeding of cold and moist causes, &c.

Of the Spring.

☉ in ♉, ♊, ♋.

This Quarter doth take his beginning the eleventh day of March, at what time the Sunne entred into the first minute of ♉, and doth continue whilst the Sunne is passing through these three Vernall Signes, ♉, ♊, and ♋. This Quarter doth resemble growing youth. The Diseases incident to this Quarter, are like to be hot feauers, small pox, Measels, Scabs, and Murdles,

Perkins. 1629.

Of Summer.

☉ in ♋, ♌, ♍.

The Summer Quarter doth take his beginning, when the Sunne doth enter into the first degree of Cancer, which will be this yeere the 11. day of Iune, about 7. a clocke and 11. minutes in the morning, and doth continue whilst the Sunne passeth through ♋, ♌, ♍. Now are the dayes longest, and the Iyre hottest, therefore, but for necessity, bid Whysche adieu.

Of Autumne.

☉ in ♎, ♏, ♐.

Autumne, or Harvest Quarter (commonly called The fall of the Leafe, or of some, the latter Spring) doth beginne when the Sun doth enter into the first degree of Libra, making againe the day and night of equall length: which will be this yeere the 13. of September, about 7. in the morning, and doth continue whilst the Sunne both passe through ♎, ♏, and ♐.

	2	22					122	62	47	43	
Decr	12	0					131	65	49	45	

The vse of the foresaid Table.

First hauing a walking-staffe diuided in 12. equall parts, (be the staffe of what length it will, being equally diuided) wherewith walking, if you desire the houre of the day, if the Sunne shine, set your staffe vpright, and see how many of those parts there are in the length of the shadowe; then looke in the Table, knowing what month and day of the month it is, which day, if you finde not in the Table, then take the day that is neereſt vnto the day you seeke for, eyther before the day, or after the day, and looke in the head of the Table, and you shall finde the houre, either beforenoone, or after noone, as the Table sheweth, for the Sunne hath like altitude at like distance from the Meridian line, in the forenoone ascending, and in the afternoone descending.

Example.

Walking abroad the 22. of Nouember, when the Sun is in 10. degrees of Sagitary, I would know what time of the day it is; I set my staffe vpright, and I finde the shadowe to containe 52. of those parts, that is the length of my staffe 4. times, and nine parts of the 12. whereby I perceiue, that it is either 10. in the forenoone, or else two in the afternoone; and so of the rest, as the Table sheweth.

Month	Day	Hour	Altitude
Nov	22	10	52
